BLUETOOTH KIT**

Model Number: BT42740

**INSTRUCTION MANUAL**

## WARRANTY DETAILS/SUPPORT

This product is warranted against defects for a period of one year if the product is faulty, Winplus will repair or replace the product (at its discretion) at no cost to you provided the product has been used in accordance with instructions provided. The benefits under our Warranty are in addition to other rights and remedies under consumer law in relation to these goods. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

## GENERAL SAFETY INSTRUCTIONS

Read this manual thoroughly before first use and keep it in a safe place for future reference, along with the warranty card, purchase receipt and carton. The safety precautions enclosed herein reduce the risk of fire, electric shock and injury when correctly adhered to. Follow all instructions and take notice of all warnings to reduce the risk of fire or electric shock.

- Do not remove the cover or the back of this product. There are no user-serviceable parts inside this product.
- Do not repair the unit yourself. Only have it serviced by qualified personnel. Supervise young children to ensure they do not play with the product.
- Do not submerge the product in liquids.
- Do not place the product near other items that may damage it, such as naked flame sources (lit candles) or excessive heat (bar radiator).

**WARNING: Using headphones while operating a motorcycle, motor vehicle, watercraft or bicycle can be dangerous. Use caution while using your Motorcycle Helmet Bluetooth kit when you are engaging in any activity that requires your full attention.**

| 1. Bluetooth Receiver          | 5. Charger & Headset Socket |
| 2. Multi-function Button (MFB) | 6. Headset Plug             |
| 3. Power/Intercom Button       | 7. Microphone               |
| 4. Jog Wheel                   | 8. Ear Speaker              |

# INSTRUCTIONS

## Fitting the Bluetooth Receiver to Your Helmet

1. Using the provided screw driver, loosen the Headset Clip screws.
2. Slide the Headset Clip onto the left side of the helmet (when on your head). Take care to place the inside of the Headset Clip under the helmet padding.
3. Adjust the clip until you find the best location for your helmet. Ensure that the slots in the Headset Clip mount are facing away from the helmet.

4. Tighten the screws to hold the clip firmly in place.

**WARNING: Excessive tightening may damage the clips.**

5. Slide the Bluetooth receiver down into the slots on the Headset Clip mount. Make sure that it is locked in securely.
6. To attach the ear speaker & microphone headset, test which part of the helmet will be the best location by putting your helmet on and locating the place closest to your ears. You will need to put the helmet on a few times to find the optimum position to apply the pad. When the correct position is found, remove the adhesive protective strip and apply the felted earphone pad.

7. Attach ear speaker to the felted pad. Run the Microphone Arm along the inside wall of the helmet, to where your mouth will be. The Microphone Arm is flexible and should be adjusted so it sits in the best position in front of your mouth. Some helmets have removable padding; if yours does, it is recommended to run the speaker and microphone under the padding.
8. Connect the headset to the Bluetooth receiver. The plug can only be inserted in one orientation

**WARNING: Inserting the plug backwards will cause damage to the Bluetooth Receiver. Use caution when assembling.**

9. Secure the cord of the Headset Plug inside the helmet. Tuck any extra wire into the helmet. Ensure that only a few centimetres of the cord comes out.

You have successfully mounted the Motorcycle Helmet Bluetooth.

## Charging the Bluetooth Receiver

Before using this device, fully charge the Bluetooth Receiver. This should take around 4 hours.

1. Insert the USB plug of the charging cable into the small USB jack on the headset. Insert the other end of the charging cable into the Power Adaptor or your computer's USB port.
2. While charging, the red LED on the Bluetooth receiver will illuminate, when the charging is finished, the red LED will switch off.

**Tip: To maintain long life from the internal lithium battery, charge your device at least once a month.**

## Powering On and Off

1. To turn the device on, press the power/intercom button for 3 seconds until you hear a beep. A blue light will flash quickly 3 times and then continue short flashes at regular intervals.
2. To turn the device off, press the power/intercom button for 5 seconds until you hear a beep. The Bluetooth receiver and LED lights will turn off.

### After Sales Support

Telephone: 1300 663 907  
Internet: [www.wirplus.com.au](http://www.wirplus.com.au)

## Pairing to Your Bluetooth Enabled Mobile Phone

1. Place your Bluetooth enabled phone and the Bluetooth receiver near each other. Within 1m is recommended.
2. Make sure the Bluetooth receiver is turned on.
3. Press and hold down the power/intercom button for approximately 8 seconds until the receiver beeps twice. The red and blue LEDs will flash alternately. The receiver is now actively searching for Bluetooth devices.
4. Activate Bluetooth on your mobile phone and search for the device. Refer to your phones instructions if you are unclear on how to search for Bluetooth devices.
5. Choose the Bluetooth device named FDC-01 and choose to pair this device. If you are asked for a password, enter 0000.
6. The red & blue LEDs will then change to display blue only and the headset will beep once to confirm pairing was successful.

## To Answer an Incoming Mobile Phone Call

1. Press the Multi Function button on the receiver while the phone is ringing
2. Use the jog wheel to increase or decrease the headset volume.

**Tip: The incoming call will answer automatically once the phone has rung for 8 seconds.**

## Ending a Mobile Phone Call

1. Press the Multi Function button to end the call

## Rejecting a Mobile Phone Call

1. When you hear the phone ringing, immediately press and hold the Multi Function button on the headset until you hear a beep.

## Redial the Last Number

1. Press and hold the Multi Function button for 2 seconds or until it beeps, it will then dial your last number called

## Pairing One Motorcycle Bluetooth to Another Motorcycle Bluetooth to Use as an Intercom

1. Place both receivers near each other (within 1m)
2. Make sure both receivers are turned off
3. Press and hold down the power/intercom button on both units at the same time for approximately 8 seconds, until the receivers beep twice. The red & blue lights will flash alternately.
4. Quickly press the power/intercom button on one of the receivers. This will now search for the other receiver so they can be paired.
5. When they have successfully paired, the red & blue lights will then change to blue only (flashing) and the receiver will beep once.

### After Sales Support

Telephone: 1300 663 907  
 Internet: [www.wirplus.com.au](http://www.wirplus.com.au)

## To Start a Conversation via Intercom

1. Once the two headsets are paired with each other, press the power/ intercom button on either receiver to begin.
2. Use the jog wheel to increase or decrease the headset volume.

**Tip: You only need to press the power/intercom button once to establish a connection; conversation between the two paired headsets can now be carried out handsfree.**

## To End a Conversation via Intercom

1. Press the power/intercom button on either of the receivers

**Tip: If the intercom headset is also paired with a mobile phone, the intercom conversation will be automatically disconnected to answer the phone when there is an incoming call. The intercom function will resume once the call has ended.**

## To Play Music via Bluetooth MP3 Player

If you are using a dedicated MP3 player, the player must be a Bluetooth enabled device and be paired your Motorcycle Bluetooth receiver.

1. Select music to play directly from your music device (check your MP3 player or phone instructions for how to do this)
2. Play music through the headset press the Multi Function button once
3. Pause music press the Multi Function button again
4. Skip songs forward by quickly flicking the Jog Wheel in a clockwise direction
5. Rewind songs backwards by quickly flicking the Jog Wheel in a anti-clockwise direction
6. Volume Up by turning the jog anti wheel clockwise and holding until the volume is at the right level
7. Volume Down by the jog wheel clockwise and holding until the volume is at the right level. You will hear a long beep if the volume is at the highest or lowest level.

**Tip: To improve the performance of your headset, make sure the volume is set to the highest level on your music device.**

## To Answer a Call While Listening to Music

Calls will automatically come through the headset while music is playing.

1. To reject a call hold the Multi Function button down until you hear a beep.
2. Music will hold over the call duration and resume automatically once the call has ended.

## TROUBLESHOOTING

Problem	Solution
The Bluetooth Receiver has no power.	The Headset must be charged for at least 4 hours prior to first use. Refer to Charging the Bluetooth Device on page 7 for further details.
My helmet is uncomfortable to wear after fitting the speakers.	The placement of the speakers within the helmet may require repositioning. Two additional Felted Adhesive Earphone Pads are supplied for this purpose. Note: Some helmets have removable padding; if yours does, it is recommended to run the speaker and microphone under the padding.
My Phone wont pair with the Bluetooth Receiver	Activate the Bluetooth function on your mobile phone and search for the device, which will show up as FDC-01 on the "Device List". Refer to your phones instructions to do this. Refer to Pairing to your Bluetooth Enabled Mobile Phone on page 7 for further details.
The audio reception breaks down	Bluetooth enabled devices are susceptible to occasional interference from other common devices such as GPS units, laptops, alarms and Wi-Fi routers etc. Move away from potential sources of interference if you are experiencing problems.
I can't hear my music /incoming calls	Check the volume on the attached device. Setting your phone or MP3 player to the maximum volume usually resolves this issue

## Motorcycle Helmet Bluetooth Kit

# Repair and Refurbished Goods or Parts Notice

---

Unfortunately, from time to time, faulty products are manufactured which need to be returned to the Supplier for repair.

Please be aware that if your product is capable of retaining user-generated data (such as files stored on a computer hard drive, telephone numbers stored on a mobile telephone, songs stored on a portable media player, games saved on a games console or files stored on a USB memory stick) during the process of repair, some or all of your stored data may be lost. We recommend you save this data elsewhere prior to sending the product for repair.

You should also be aware that rather than repairing goods, we may replace them with refurbished goods of the same type or use refurbished parts in the repair process.

Please be assured though, refurbished parts or replacements are only used where they meet ALDI's stringent quality specifications.

If at any time you feel your repair is being handled unsatisfactorily, you may escalate your complaint. Please telephone us on 1300 663 907 or write to us at:
