

CORDLESS PHONE WITH DECT TECHNOLOGY

GETTING STARTED GUIDE

1

INSERT BATTERIES

Remove back battery cover by sliding the cover downwards. Insert the supplied AAA rechargeable batteries.

Note: Follow battery polarity markings to prevent damage to the phone.

2

CONNECT TELEPHONE LINE

Connect the supplied telephone cable into the base unit. Connect the other end to the live telephone point in your home or office.

3

CONNECT BASE POWER

Plug the base power adapter cord into the base unit. Connect the base power adaptor to an electrical outlet.

4

CHARGE

Place the cordless handset on the base unit to begin charging.

Note: Charge the phone for 15hrs before first use.

5

READY TO USE

After the phone is fully charged, press the Talk button. You will hear a dial tone and you can now make phone calls!

Note: If you do not hear a dial tone after installing your handset and pressing the talk button, contact your telephone service provider for assistance.
